

VIII. ENERGOEXPO

International Exhibition and Conference for Energy

Venue: Kölcsey Conference Centre, Debrecen, Hungary

Date: 21st-23rd September 2010

Main groups of the exhibits: Energy generation, transport supply and services, energy trading, utilization of alternative energy sources, power stations, power plant technology

Speciality:

- the only independent, comprehensive forum of the Hungarian energy sector
- Eastern-European investment forum

Objectives:

- to organize a trade fair, where all companies of the energy industry and their business partners will be present concentrated for the Hungarian and foreign professionals and the public
- Hungary seems to become a potential market for foreign investors and our exhibition and conference could serve as a great opportunity for companies abroad looking for business contacts in the sector in Hungary
- We would welcome at our exhibition and conference all those companies, designers, contractors, charges and associations in the field, who would like to negotiate with the Hungarian and East-European energy sector

Visitors:

- Hungarian and foreign energetic professionals
- researchers and theoretical professionals
- directors of energy producer and trader firms
